Summary

AI/ML Engineer with hands-on experience designing and deploying **production-grade AI applications, agentic workflows, and backend services**. Skilled in **Python, Flask, LangChain, and LLM integrations**, with experience building APIs, automating business processes, and integrating external tools and enterprise systems. Strong foundation in **software engineering, machine learning, and full-stack development**.

Experience

AI/ML Engineer Jul 2025 – Present
IntellixCore, United Kingdom *Remote*

- Designed core workflows and developed a production **RFP Response Generator** with **Python/Flask**, integrating RFP analysis, knowledge sources, **AI-assisted candidate shortlisting**, proposal creation, and standardized CV generation.
- Implemented **DOCX template workflows** and **SharePoint integration** for user-selected candidates, with SharePoint upload and local download of generated proposals and CVs.
- Built **backend services** for a **Document Generator** that fills DOCX templates using knowledge sources and heading-specific prompts.
- Contributed document intake and conversion for a **Data Intake and Labelling Agent**, supporting **PDF, DOCX, XLSX, CSV, ZIP**, password-protected files, **Azure OCR**, and **Markdown conversion**.
- Integrated **MCP servers** into an existing chatbot workflow for external tool access; contributed **React** interfaces for AI applications.

Teaching Assistant Sep 2023 – Jun 2025
Information Technology University, Lahore *Onsite*

- Supported **AI**, **Advanced Database Management Systems**, and **Digital Logic Design** courses for **300+ students**; helped prepare and evaluate assessments.

Software Engineer Intern Jul 2024 – Sep 2024
CloudMizan, United States of America *Remote*

- Developed a **real-time feedback and annotation widget** and frontend enhancements using **React**.

Technical Skills

Languages: Python, JavaScript, C++, SQL
AI/ML: LangChain, LangGraph, MCP, Hugging Face Transformers, Wav2Vec2, Whisper, LLM applications
Backend & Frontend: Flask, REST APIs, React, Node.js, Express.js
Data & Tools: PostgreSQL, MySQL, MongoDB, Firebase, Docker, Git, Azure OCR, SharePoint

Projects

AI Arabic Pronunciation Trainer | *Python, Wav2Vec2, Whisper, Flask, React, Docker* Sep 2024 – Jun 2025

- Developed a **full-stack AI-assisted Tajweed learning application** that analyzes spoken Arabic and provides pronunciation feedback using **Wav2Vec2**, **Whisper**, and phoneme-level speech processing. Built an audio pipeline for noise/silence removal, transcription, **forced alignment**, and extraction of phoneme clips; connected the models to a **Flask REST API** and **React** interface. GitHub

Geospatial Road Crime Analysis in Atlanta | *Python, GeoPandas, Folium, Matplotlib* May 2024 – Jun 2024

- Analyzed Atlanta crime incidents and **population-density data** to examine geographic patterns in road crime. Cleaned and joined spatial datasets, visualized **crime hotspots** using **GeoPandas/Folium**, and implemented a **crime-aware route recommendation** approach to identify potentially safer paths. GitHub

Education

Information Technology University Sep 2021 – Jun 2025
Bachelor of Science in Computer Science *Lahore, Pakistan*

- **CGPA: 3.48/4.00**
